Mobile Entertainment

MOBILE AUDIO SYSTEMS

AX-900

AM/FM RADIO RECEIVER

The AX-900 provides all your mobile audio basics, with a few added practical extras! The Xtreme Tuner gives extra power, range & clarity for AM/FM radio users. The built-in Ultra Memory prevents battery disconnection from deleting your favourite settings - an ideal feature for Agricultural & Trucking vehicles!! Also perfect for such environments, the AX900 has no CD mechanism, which protects the unit from vibration & dust. Plug & Play your favourite music from your portable MP3 player through the front AUX input....cable included!

AX-9000

24-12 Volt MULTIMEDIA AM/FM RECEIVER w USB/SD/MMC

The super-compact AX-9000 bridges the gap between 12 & 24 Volt vehicles, bringing instant mobile entertainment to any car, truck, bus or tractor! It's smart design eliminates the need for a converter & the tiny 80mm chassis depth allows the AX9000 to fit where other head units can't! Access your MP3 or WMA media, including iPod, through the handy front panel ports: AUX-IN, USB and SD/MMC! The other intelligent functions include built-in Ultra Memory & FSTN LCD Display, which means added sharpness, contrast & extra wide viewing angles.

AX-901

MP3/CD PLAYER RECEIVER

The AX-901 offers a solid audio experience for true mobile entertainment! All the essentials are thrown in here, with playback of all CD formats, WMA & MP3 files. The AX901 also allows direct connection of portable music devices. It includes a 3.5mm cable and front AUX input, making the AX901 ready for iPod and MP3 Players! Standard AXIS head unit features like Electronic Shock Protection and an impressive 5 Volt Amp pre-out, complete the AX901. Remove and store the AX901's flip-down & detachable face with the press of a button!

AX-902

BLUETOOTH MP3/CD PLAYER RECEIVER

The AX-902 seamlessly integrates your lifestyle with your vehicle! Boasting a full function Bluetooth system, the AX902 lets you stream audio or enjoy safe, genuine, hands-free mobile phone usage while you drive! Includes external microphone! The AX902 features full CD/MP3 playback, plus direct USB connection & playback through the front USB port. iPod lovers can also enjoy non-stop tunes as the AX902 fully controls & charges your iPod! (iPod interface cable included!) A handy front AUX input also connects other MP3 players!

AX-903

MP3/CD PLAYER RECEIVER w USB & SD/MMC

The AX-903 combines simplicity with a handy selection of mobile entertainment options! It's no-fuss design gives you quick access to a trilogy of front panel connection points: 3.5mm AUX input, USB port, or SD Slot! Enjoy your CD, MP3 or WMA music collection at any time, or tune-in to your favourite AM/FM radio station. The AX-903 even lets you directly plug & play your iPod or MP3 player! Like the rest of the AXIS head unit line-up, the AX903 is built to perform and last and carries a full 2 year warranty.

AX-904

MARINE QUALITY MP3/CD PLAYER RECEIVER

The AX-904 blends power and control with durability! It's water, dust & salt resistant design makes it suitable for marine and other demanding environments. Choice is at your fingertips with the AX904: Control an external CD changer, or even adjust the bass levels to suit your music preferences through the 2 channel subwoofer control. The AX904 also includes an LCD Contrast Control that lets you adjust the viewing angle. The high power output (45 Watt x 4) enhances your enjoyment of all your music tracks, whether a CD, MP3 or WMA file!

MOBILE MULTIMEDIA SYSTEMS

AX-905

DVD PLAYER RECEIVER

The AX-905 transforms your driving time into complete non-stop entertainment! Combining style with functionality, the AX905 lets you enjoy all of your favourite music or movies! Apart from DVD playback, the AX905 also supports CD, MP3, WMA, VCD, AVI, MPEG4, JPEG, & many other file formats allowing you maximum choice. A front AUX input & USB slot, plus SD card reader, provide alternative connection points & support of external media devices. Completing the AX905's sleekness is a Pop-up Rotary Volume Control!

AX-906

3-INCH DUAL ZONE LCD DVD PLAYER RECEIVER

The AX906 delivers a state of the art multimedia experience! Through the high quality TFT widescreen monitor you can watch your favourite movie, or even watch your back, with an easy 'plug-n-play' connection for external reversing cameras! Other outstanding features like 'Dual Zone' give you impressive control by creating split entertainment zones inside the car! The AX906 also offers full control & charge of your iPod! (Interface cable included!) & lets you enjoy all your CD, MP3, or WMA music via disc, USB, SD, or front AUX input!

MULTIMEDIA HEAD UNIT OF THE YEAR! Under $1000

2009 AUSTRALIAN INCAR AWARDS HIGHLY COMMENDED

MOBILE MULTIMEDIA DVD PLAYER

AX-908

The AX908 converts any standard mobile audio system into an action packed arena! This stand-alone multimedia player supplies a complete DVD solution, with a built in FM modulator that gives wireless audio integration to any existing audio setup! Additional inputs & outputs add extra plug-n-play options for Playstation, Xbox, Wii, digital cameras, camcorders, iPods & MP3 Players! Get connected through USB or SD, both accessible from the front of the unit! Use the infrared eye and remote control for a seamless installation!

10.2 INCH LCD SLIMLINE MULTIMEDIA DVD SYSTEM

AX-9102

The AX9102 is an advanced 'all-in-one' total roof mounted multimedia and entertainment system! Compatible with countless media formats currently in use, the AX9102 brings your home theatre and music studio to the road! Flip down the high quality 10.2 inch widescreen LCD monitor to bring movies & games to life! With built-in FM & IR transmitters, integrate your audio wirelessly or listen to the action through the 2 pairs of quality wireless headphones included in the pack! The AX9102 also extends your media and connectivity options with direct USB and AUX inputs. The lightweight, Ultra-Slimline construction offers a compact, sleek installation finish & includes neatly built-in dome lights. Suitable for all vehicle types and applications, the AX9102 is a complete mobile multimedia solution!

MULTI MEDIA READY

AX-907

7 INCH LCD DUAL CHANNEL IR MONITOR

AX-985

8.5 INCH LCD DUAL CHANNEL IR MONITOR

LCD MONITOR SOLUTIONS

AXIS LCD Screens present a crystal clear picture quality while enjoying your favourite movies, music or games from either the headrest or dash! (Brackets included!) The AX-907 & AX-985 support playback in widescreen (16:9) format & automatically detect & play both PAL & NTSC! With multiple inputs, the screens allow switching between 2 simultaneous video signals, so operating a reversing camera together with a movie is easy! With Dual Channel IR Transmission, you can listen to all the action wirelessly, through any pair of compatible headphones. To enjoy all your favourite music, simply plug in your iPod or MP3 Player! The AX 985-2HR is a pre-installed, twin headrest DVD system. (Available in Black or Grey!) This Dual Package comes complete with headphones & independent DVD Players allowing maximum user flexibility. Adjustable poles mean suitability with countless vehicles, while the swivel-screen lets you adjust the viewing angle to your preference with a touch. This pack also offers other clever features like USB, SD & 8 Channel FM Modulator.

AX 985-2HR

PRE-INSTALLED DVD HEADREST PACKAGE

AX-909DT

DIGITAL MOBILE TV TUNER SET TOP BOX

The AX909DT brings high quality television to the road and completes your mobile audio visual system! With up to 200 channels, the AX909DT suits all Australian free to air digital transmission and is compatible with Digital TV & Radio! The AX909DT allows flexible mounting options & comes with a full function remote control plus remote eye sensor. Twin diversity built-in tuners ensure maximum reception & 2 on-glass diversity antennas are included in the kit!

TECHNOLOGY

Plays digital storage of video, audio and data in compressed format. 12cm diameter disc. The number of pits in the DVD are much smaller and closer together than a standard CD. DVDs hold much greater amounts of information (eg complete movies). Produces ultra sharp pictures and surround sound.

A music compression format developed by Microsoft Corporation. It uses the latest coding technologies to compress an original audio track whilst maintaining great audio quality.

RCA connection for external audio sources. Positioned at rear chassis. Compatible with audio output of most iPod and MP3 Players.

Designed for simple connectivity to a wide variety of external media source units & storage devices. Audio, Video/ Photo, Cameras, Game Consoles, etc.

Direct connection of an external mass storage media via an integrated serial interface.

Selectable 2-channel wireless headphone system. Infrared stereo system. Eliminates wires and permits choice of 2 frequencies.

To adjust the viewing angle of an LCD display. Ideal when a source unit is mounted in a high or low console.

To give greater bass control from your system. Adjusts the cut-off frequency and output level for your amplifier/ subwoofer.

Full function remote controller with an LCD display.

Easy selection and equalisation of audio modes - Flat, Classic, Rock or Pop. Enjoy sound according to one's personal taste.

An easy, simple and safe way to use your cell phone while on the move. A type of wireless standard radio frequency (2.45GHz) interface between mobile phones and their accessories. This allows Bluetooth-enabled mobile phones to be connected hands-free through a compatible device.

Plays digital storage of compressed audio files. A popular format that allows large volumes of audio files to be stored on one CD. Plays MP3 files from CD-ROM, CD-R/RW, SD-MMC or USB devices.

Plays this audio and video compression standard that allows the storage of audio video files to be streamed or stored on media like CD and DVD.

The standard RCA output connection system to easily connect one or more external amplifiers or an equaliser.

Integrated slot to play MP3/WMA compressed sound files. SD Card (and the older Multi Media Card-MMC) formats can store high density memory with maximum transfer rates.

Connection system to reproduce music files from the flash memory of an MP3 player or iPod using the AUX-IN solution. This may be through front panel AUX-IN, USB, or Rear RCA Line-in.

Wireless headphone system. Infrared stereo system. For use with LCD Monitors with IR transmission.

Stores the programmed memory data of a source unit even when the battery is disconnected. A valuable feature for agricultural and civil installations.

For a high level of AM & FM radio reception even where the signal is poor.

The Opening system for the front face panel. This provides a clean appearance when installed and protects the disc mechanism when closed. A detachable face panel prevents theft.

Higher output from the RCA output connections to provide superior signal levels to one or more external amplifiers.

The setting that lets the user split and operate the radio output AND the disc function. For example, the driver can listen to radio while passengers watch a DVD. Create 2 seperate entertainment zones.

Plays digital storage of audio and data files. 12 cm disc of plastic polycarbonate. Digital information is encoded onto a metallic surface via a series of pits generated by laser pulses.

To give greater bass control from your system. A fixed low frequency line to an amplifier.

3.5mm stereo connection socket for external audio sources. Positioned on front panel. Compatible with audio output of most iPod and MP3 Players.

Allows simple integration of an auxiliary camera source. This is an ideal safety device to reverse and park safely. Activates when reverse gear is selected.

Connection, Control and Charging of an iPod device (iPod is a Trade Mark of Apple Computer company).

Wireless FM radio frequency transmitter. Car radio can be tuned to receive the frequency from an external source - eg DVD player/video system.

Uses digital signals for sound reproduction. Output of digital signals to an external processor.

To seamlessly control all features of a compatible CD Changer from the head unit.

Electronic 'buffer' memory is built-in to all AXIS CD and DVD Players. The digital signal is stored momentarily to smooth out the sound experience even in rough conditions. (Typical CD memory is 12/24 seconds and up to 120 seconds in MP3 mode)

The superior quality of AXIS Products allows users to be fully satisfied with the performance and reliability of their audio & visual systems. Backing this up is a solid warranty period of two years.

Weatherproof design to keep out the elements such as moisture, dust & salt.
